

Flore Remouit

Address

Division of electricity
Ångström Laboratoriet
751 21 Uppsala

Email: flore.remouit@angstrom.uu.se

Research Topic

Project title: Development of underwater electrical sub-systems and support ROV
Related Work Packages: 6

Short Biography

Master in Mechanical engineering with a specialty in material science at Ecole Centrale de Nantes, Nantes, France, 10.2012.

Publications

Current Research

Development of a Remotly Operated Vehicle (ROV) tools and methods for operation, installation and maintenance of wave energy converters and marine substations to decrease the cost and minimize the risk associated with sub-sea work. Sub-sea cable connection is the main task but other operations may include surveillance, monitoring, and other forms of maintenance.

Supervisor(s)

Magnus Rahm
